What is
Masader

Masader is the brand name of the Oman Virtual Science Library, which enables universities and academic and research institutions affiliated with the Omani Research and Education Network to access global knowledge content through a single entry point. “Masader” provides diverse electronic resources from major publishers, including full-text materials, databases, and multimedia, in addition to training and technical support services.

Our values in Masader

Accessibility

we want Masader to be available to as many people as possible, and across the Sultanate of Oman. Although primarily intended for the academic community, there are no restrictions to access, the only requirement being membership of OMREN, which is open to all public and private institutions engaged in research and educational activities.

Collaboration

we work with several partners, particularly OMREN and its member institutions. With these and new strategic partners, we seek to strengthen Masader, extending its reach, depth, and effectiveness.

Inspiration

many of our resources focus on subjects and themes that have advanced human knowledge through the ages. Masader seeks to inspire a thirst for knowledge and understanding that can make a powerful contribution to the continued advancement of mankind.

Training workshops in Masader

In-person workshops:

It is implemented in coordination with institutions according to their needs. The library also organizes a mobile “Masader” convoy that travels around the various governorates of the Sultanate of Oman to reach the largest possible number of beneficiaries.

Online workshops:

It is provided remotely to “Masader” members, and is constantly updated through the platform’s official website, with the possibility of organizing additional electronic workshops upon members’ request, ensuring that their training needs are met in a flexible manner.

The Oman Virtual Library “Masadar” offers two types of specialized training workshops, in a way that enhances the dissemination of digital knowledge and expands the scope of benefiting from its services.

دار المنظومة
DAR ALMANDUMAH
الرواد في قواعد المعلومات العربية

The company is a Saudi firm established in 1424 AH (2004 CE), specializing in building and developing scientific databases for research and academic purposes. Over the years, the company has established itself as a leader in the information and related services sector, thanks to its high level of professionalism in managing its operations and services. The company possesses extensive experience in organizing digital information content, databases, and their design and search mechanisms.

المنظومة

قاعدة معلومات الرسائل الجامعية

Collection of research papers and articles

+165 thousand

The primary and essential resource for Arab researchers across all academic disciplines, this database specializes in Arabic dissertations (scientific theses). It is the largest of its kind, containing over 150,000 master's and doctoral theses from various Arab universities. The company has secured the publishing rights for over 103,000 theses, making them available in full text. The remaining theses are presented with abstracts and the first 24 pages only, as permitted by regulations.

AraBase

قاعدة معلومات اللغة والأدب

Number of conferences
866

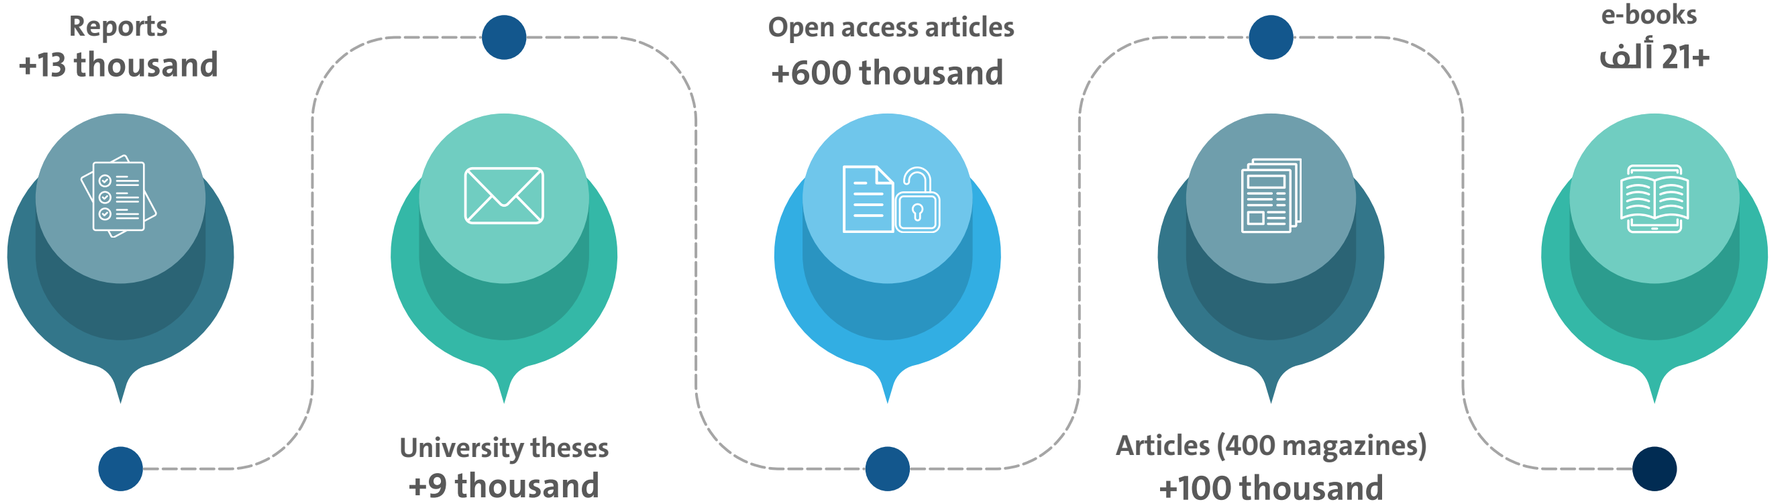

Collection of research papers and articles
+392 thousand

The HumanIndex database includes virtually all Arabic-language journals, periodicals, and yearbooks published in Arabic and non-Arabic-language publications, along with conference and symposium proceedings in Arabic. It covers all publications in the humanities from 1927 to the present.

The database encompasses various fields within the humanities, including, for example, history, biographies, geography, philosophy, arts, archaeology, public relations, media, and other related subjects.

المنهل
ALMANHAL

It is the only provider of Arabic electronic information in the world. We provide full-text searchable Arabic databases of scholarly publications from the Middle East, Africa, and Asia. Al-Manhal combines extensive publishing expertise with the best technologies in the world to enable users in universities, government institutions, businesses, schools, and public libraries to discover thousands of books, journals, e-papers, and conference proceedings from leading publishers and research institutes in the Middle East, Africa, and Asia, and to provide researchers with efficient and easy access to these resources.

IEEE Xplore® Digital Library

+6 Million Document

1.3 Million Articles

+4.5 Million Conference Papers

5,000 Standard Documents

The IEEE Xplore digital library provides a single source for nearly one-third of the current global literature in electrical engineering and computer science, giving unparalleled access to publications from the Institute of Electrical and Electronics Engineers (IEEE) and the Institution of Electrical Engineers (IEE).

The IEEE database is updated daily, with around 20,000 new documents added monthly, including up to 200,000 conference papers annually, and contains an archive dating back to the late 19th century for some titles, as well as 19,900 papers from VDE conferences.

IGI Global
DISSEMINATOR OF KNOWLEDGE

IGI Global is an international academic publisher founded in 1988. They focus on publishing the most advanced, peer-reviewed reference books and scholarly journals covering 11 core areas, including business, computer science, education, medicine, healthcare, science, engineering, social sciences and more.
